

DHANUSH KUMAR .G

DevOps engineer

📍 Chennai, Tamil Nadu, India ✉ dhanushindevops@gmail.com ☎ +91 9884858298 🔗 [Click Here for LinkedIn](#)

PROFESSIONAL SUMMARY

Specialized DevOps Engineer with expertise in automating and optimizing cloud deployments on AWS. Proficient in CI/CD pipelines using GitLab CI, Docker, Kubernetes, and Infrastructure as Code (IaC) with Ansible and Terraform. Skilled in Python and Bash scripting for task automation and configuration management. Adept at leveraging Git, AWS CloudWatch, and monitoring tools to enhance system reliability, scalability, and security. Committed to cross-functional collaboration to drive software quality and operational efficiency.

EXPERIENCE

■ Aug 2025 - Current

iAgami Technologies - Trichy, Tamil Nadu, India - DevOps Engineer

- Independently managed Dev, QA, Staging, and Production environments, handling deployments, monitoring, and production support with minimal supervision.
- Designed and managed AWS infrastructure for multiple projects, including networking, security, scalability, and high-availability architecture.
- Built and maintained CI/CD pipelines using GitLab CI/CD and Jenkins with Blue-Green deployment and rollback strategies for reliable zero/minimal downtime releases.
- Automated infrastructure and deployment workflows using Terraform, Ansible, Docker, and Kubernetes, improving operational efficiency and scalability.
- Monitored and optimized applications using CloudWatch, Grafana, and Prometheus while troubleshooting critical production issues and ensuring system stability.
- Implemented DevSecOps practices with SonarQube and Trivy and collaborated closely with development teams to accelerate secure and stable releases.

■ April 2024 - June 2025

Samindz India - Noida, Uttar Pradesh, India - DevOps Engineer

- Accelerated deployment cycles by 30% through robust CI/CD pipelines using GitLab CI, ensuring fast and reliable software releases.
- Implemented Git-based version control, enabling effective collaboration across development teams and maintaining code integrity in repositories.
- Designed and deployed containerization strategies with Docker and Kubernetes, improving resource efficiency by 25% and streamlining environment management.
- Monitored and optimized continuous integration/deployment processes, resolving build and release failures to achieve 98% pipeline uptime.
- Provided 24/7 operational support by monitoring critical services using AWS CloudWatch, ensuring zero downtime during peak traffic events.
- Automated repetitive tasks with Python and Bash scripts, enhancing team productivity by 25% and reducing manual effort.
- Conducted security scans using Trivy and SonarQube, mitigating vulnerabilities early and reducing security risks.
- Configured and optimized Nginx web servers with Terraform and Ansible, improving load balancing and performance by 10%.

SKILLS

- Version Control: Git
- CI/CD: GitLab CI, GitHub Actions
- Configuration Management: Ansible
- Containerization and Orchestration: Docker, Kubernetes
- Infrastructure as Code: Terraform
- Monitoring&Logging: CloudWatch, Grafana, DataDog
- Cloud Platforms: Amazon Web Services (AWS)
- Collaboration and Project Management: JIRA
- Networking and Security: Nginx, Trivy Scan, SonarQube
- Scripting and Programming: Python, Bash, Linux

EDUCATION

July 2018 - June 2022

Bachelor of Technology :- Information Technology

B.S.A Crescent University Chennai, Tamilnadu

June 2017 - April 2018

Higher Secondary School

Ebenezer Matric Higher Secondary School Chennai, Tamilnadu

LANGUAGES

- English
- Tamil
- Telugu
- Hindi
- Malayalam

WORKSHOP

• IIT Bombay PHP and MySQL Training

A certified course conducted remotely from IIT Bombay, is a pre-requisite for completing this training. Working on real-world projects related to PHP functions, data types, script syntax, web interface, MySQL client and server concepts and database objects.

• IBM-Big Data Training

A certified course conducted remotely by IIT Bombay. Covers big data concepts, tools, and techniques, including Hadoop, Spark, data processing, analytics, and real-world projects. No prerequisites in PHP, MySQL, or web development required.

Projects

1) Covid 19 Information retrieval using Deep Learning

We developed a system which helps in retrieving the documents based on the user query for corona information. Its a semantic, multi-stage, search engine designed to handle complex queries over the COVID-19 literature, potentially aiding overburdened health workers in finding scientific answers and avoiding misinformation during a time of crisis.

2) BioArt

BioArt is an AI-powered healthcare and eCommerce platform focused on digital healthcare services and product management. The project was delivered under tight deadlines, where I independently managed AWS infrastructure, CI/CD automation, deployments, monitoring, and production support while ensuring stable and timely releases in high-pressure environments.

3) Twellr / Twellr UAE

Twellr is an AI-powered skin and hair analysis platform that provides personalized insights using image processing and AI-based recommendations. For both Twellr and Twellr UAE, I independently handled AWS architecture, CI/CD pipelines, Blue-Green deployments, infrastructure automation, monitoring, and production releases. The UAE deployment was executed within aggressive timelines, requiring strong ownership, fast delivery, and efficient handling of critical production deployments under pressure.

CERTIFICATIONS

May 2025

- DevSecOps Principles - Codecademy [SCORE: 90%]

December 2023

- PEGACPSA88V1 - Certified Pega System Architect 8.8 [SCORE: 82%]

December 2023

- PEGACPSSA88V1 - Certified Pega Senior System Architect 8.8 [SCORE: 81%]

ACCOMPLISHMENTS

Guinness World Record Holder: Achieved recognition for reaching the world's highest motorable pass, situated at an altitude of 19,024 feet.

Leadership Role: Admissions Council Leader in B.S.A. Crescent University, Chennai, India.
